

# Hausdorff Approximations

Filesize: 5.62 MB

## ***Reviews***

*The publication is fantastic and great. It can be rally exciting through reading period of time. I am just very happy to inform you that this is the greatest publication i actually have read in my very own daily life and could be he very best ebook for at any time.*

***(Prof. Alvis Wuckert)***

## HAUSDORFF APPROXIMATIONS

To save **Hausdorff Approximations** PDF, you should click the button below and save the file or have accessibility to additional information which might be have conjunction with HAUSDORFF APPROXIMATIONS ebook.

Springer Okt 1990, 1990. Buch. Book Condition: Neu. 235x155x26 mm. This item is printed on demand - Print on Demand Titel. Neuware - 1 Elements of segment analysis.- 1.1. Segment arithmetic.- 1.1.1. Partial orderings.- 1.1.2. Lattice operations.- 1.1.3. Arithmetic operations.- 1.1.3.1. Addition and subtraction.- 1.1.3.2. Multiplication and division.- 1.1.4. Distance and norm.- 1.2. Segment sequences.- 1.2.1. Segment limits.- 1.2.2. Theorems on segment limits.- 1.3. Segment functions.- 1.3.1. The segment limit of a segment function.- 1.3.2. Segment derivatives.- 1.3.3. Segment continuity.- 1.3.4. H-continuity.- 2 Hausdorff distance.- 2.1. Hausdorff distance between subsets of a metric space.- 2.2. The metric space  $F$ .- 2.3. H-distance in  $A$  and its properties.- 2.4. Relationships between uniform distance and the Hausdorff distance.- 2.5. The modulus of H-continuity.- 2.6. The order of the modulus of H-continuity.- 2.7. H-continuity on a subset.- 2.8. H-distance with weight.- 3 Linear methods of approximation.- 3.1. Convergence of sequences of positive operators.- 3.2. The order of approximation of functions by positive linear operators.- 3.3. Approximation of periodic functions by positive integral operators.- 3.3.1. The Fejer operator.- 3.3.2 The Jackson operator.- 3.3.3. The generalized Jackson operator.- 3.3.4 The Vallée-Poussin operator.- 3.4. Approximation of functions by positive integral operators on a finite closed interval.- 3.4.1. The Landau operator.- 3.4.2. The generalized Landau operator.- 3.5. Approximation of functions by summation formulas on a finite closed interval.- 3.5.1. Bernstein polynomials.- 3.5.2. Fejer inteipolational polynomials.- 3.6. Approximation of nonperiodic functions by integral operators on the entire real axis.- 3.6.1 The Fejer operator in the nonperiodic case.- 3.6.2. The generalized Jackson operator in the nonperiodic case.- 3.6.3. The Weierstrass operator.- 3.7. Convergence of derivatives of linear operators.- 3.8. A-distance.- 3.9. Approximation by partial sums of Fourier series.- 4 Best Hausdorff approximations.- 4.1. Best approximation by algebraic and trigonometric polynomials.- 4.1.1. Uniqueness conditions for the polynomial of best approximation.- 4.1.2....
