RareBooksClub. Paperback. Book Condition: New. This item is printed on demand. Paperback. 40 pages. Original publisher: Washington, DC : Western Energy and Land Use Team : National Coastal Ecosystems Team, Division of Biological Services, Research and Development, Fish and Wildlife Service, U. S. Dept. of the Interior, 1984 OCLC Number: (OCoLC)310403880 Subject: Muskrat -- United States. Excerpt: Reproduction The reproductive habitat requirements of the muskrat are assumed to be identical with its water, food, and cover requirements as described above. Interspersion The area occupied by muskrats may be influenced by a variety of factors that include environmental conditions, the size, configuration and diversity of the aquatic habitat, social pressures, and season (Perry 1982). Neal (1968) believed that habitat quality was more important in determining muskrat density than were intraspecific interactions. Muskrat home ranges in Iowa were consistently larger in aquatic habitats with less dense vegetation than they were in habitats with dense emergent vegetation. Danell (1978) reported that the mean distance between muskrat lodges was 110 m (360. 8 ft) and no houses were closer together than approximately 40 m (131. 2 ft). Most...
