Brooks Cole/Cengage Learning India, 2010. Softcover. Book Condition: New. First edition. Calculus with Early Transcendental Functions Success in your calculus course starts here! James Stewart`s CALCULUS texts are world-wide best-sellers for a reason: they are clear, accurate, and filled with relevant, real-world examples. With CALCULUS WITH EARLY TRANSCENDENTAL FUNCTIONS, Stewart conveys not only the utility of calculus to help you develop technical competence, but also gives you an appreciation for the intrinsic beauty of the subject. His patient examples and built-in learning aids will help you build your mathematical confidence and achieve your goals in the course! Stewart`s writing style speaks clearly and directly to the student, guiding them through key ideas, theorems, and problem solving steps. He encourages students to think as they read and learn calculus. Every concept is supported by thoughtfully worked examples - many with step-by-step explanations - and carefully chosen exercises. The quality of this pedagogical system is what sets Stewart`s texts above others. A clean, user-friendly design provides a clear presentation of calculus. The art program and its functional and consistent use of color helps students identify and review mathematical concepts more easily. Early transcendental functions (exponential and logarithmic) are introduced in Chapter 1. The topic of Differential Equations is unified by the theme of modeling. Qualitative, numerical, and analytic approaches are given equal consideration. Examples are not only models for problem solving or a means of demonstrating techniques-- they also encourage students to develop an analytic view of the subject. Many of these detailed examples display solutions that are presented graphically, analytically, and/or numerically to provide further insight into mathematical concepts. Margin notes expand on and clarify the steps of the solution. Stewart draws on physics, engineering, chemistry, biology, medicine, and social science to motivate students and demonstrate the power of calculus as a problem-solving...
